PROFESSIONAL SUMMARY

- Angular Developer with 2+ years of experience building responsive and scalable web applications.
- Strong proficiency in Angular (v16–19), TypeScript, JavaScript (ES6+), and RxJS.
- Experienced in REST API integration, reusable component design, and modular architecture.
- Skilled in Angular Material and Bootstrap for developing user-friendly UI.
- Familiar with performance optimization techniques such as lazy loading and efficient state handling.

TECHNICAL SKILLS

- **Frontend:** Angular (14–19), TypeScript, JavaScript, HTML5, CSS3.
- **UI Libraries:** Angular Material, Bootstrap.
- **Backend:** Java, REST APIs.
- **Database:** MySQL.
- **Tools:** Git, GitHub, GitLab, Bitbucket, JIRA, Postman, VS Code.
- **Testing:** Jasmine, Karma.

WORK EXPERIENCE

Software Engineer

TVM Info Tech Private Limited, Chennai

March 2024 – Present

- Developed and maintained Angular-based web applications with focus on usability and performance.
- Built reusable components and services to improve development efficiency.
- Integrated REST APIs and handled errors using HTTP interceptors.
- Worked on Reactive Forms with validations for dynamic form handling.
- Participated in Agile ceremonies including sprint planning and code reviews.

PROJECT EXPERIENCE

Drug Manufacturing and Management System – Angular Developer (June 2025 – March 2026)

- Developed UI for managing drug production lifecycle across multiple stages.
- Implemented Kanban-style board to track product movement between stages (e.g., QA, MFG, Approval).
- Created reusable components for stage-based workflows.
- Integrated backend APIs and handled asynchronous data using RxJS.
- Ensured responsive design across different screen sizes.

Housing and Document Management System – Full-Stack Developer (Sep 2024 – May 2025)

- Built application to manage customer housing and property-related data.
- Implemented Reactive Forms with validations for secure data entry.
- Integrated REST APIs for data retrieval and submission.
- Developed responsive UI using Angular Material and Bootstrap.

Bank Management System – Angular Developer (Mar 2024 – Sep 2024)

- Developed role-based web application with Admin and Customer functionalities.
- Implemented core features like account handling and transaction tracking.
- Built modular UI components for better maintainability.
- Integrated APIs and ensured smooth data flow between frontend and backend.

KEY SKILLS & STRENGTHS

- Strong understanding of Angular architecture and component lifecycle.
- Good knowledge of RxJS (Observables, subscriptions).
- Experience in debugging using Chrome DevTools.
- Ability to write clean and maintainable code.
- Good team collaboration and communication skills.

EDUCATION

B.E – Computer Science and Engineering

SKP Engineering College – Tiruvannamalai

CGPA: 8.15 | 2019-2023
